

ENSURE A BRIGHT FUTURE FOR YOUR CHILD

HPV vaccination stops **90% of HPV cancers** before they start.

HPV vaccination is safe and works. It provides long-lasting protection against six types of cancers. It is strongly recommended by pediatricians and primary care providers.

Now is the time to act. Pledge to protect your child against HPV and HPV cancers – because HPV vaccination is cancer prevention.

■ I pledge to
protect my
child against
HPV cancers.
