

## A PATH TO PREVENTION:

# State Profile: Louisiana

On-time HPV vaccination protects best. HPV vaccination is routinely recommended at **age 11 or 12 years and may be started at age 9**. HPV vaccination is recommended for everyone ages 9-26. It's not too late to catch up on HPV vaccination. People ages 27-45 are also strongly encouraged to talk with a health care provider to see if HPV vaccination is right for them.

## HPV VACCINATION RATES FOR 13-17 YEAR-OLDS AS OF 2023:

Louisiana has increased HPV vaccination coverage of **≥1 dose by 18% and up-to-date (UTD) by 24% since 2016**. Coverage remains **higher than the U.S. average** but still falls below the Healthy People 2030 goal of 80% UTD. Compared to meningitis and whooping cough (Tdap) vaccines routinely recommended for adolescents, HPV vaccination coverage lags. Louisiana vaccination rates **among 13-17 year olds were 90% for meningitis vaccine and 91% for Tdap vaccine in 2023**.

**HPV vaccination protects against more than 90% of HPV cancers.**

# HPV VACCINATION RATES FOR 13-17 YEAR-OLDS AS OF 2022:

**HPV Vaccination by Race/Ethnicity**

**HPV Vaccination by Insurance Coverage**

**HPV Vaccination by Urbanicity**

**HPV Vaccination by Sex**

----- Healthy People 2030      ■ ≥1 HPV Vaccination      ■ HPV Vaccination Up-to-date

Demographic data for 2018-2022 are the most recently available.

## HPV CANCERS:

HPV is a common virus linked to six types of cancer. The two most common HPV-associated cancers are oropharyngeal and cervical cancers. **Incidence rates of HPV cancers overall and for oropharyngeal and cervical cancers are higher in Louisiana compared to the U.S. averages.**

### New Cases

	All HPV Cancers	Oropharyngeal Cancer	Cervical Cancer
United States Overall	12.5	5.2	7.1
Louisiana Overall	15.2	6.3	9.5
United States	Male: 11.2, Female: 13.9	Male: 9.1, Female: 1.6	Louisiana ranks in the <b>Top 6 nationally</b> in cervical cancer incidence rates.
Louisiana	Male: 12.7, Female: 17.7	Male: 11.0, Female: 2.0	

Incidence rates shown are cases per 100,000 persons.

## ACTION STEPS:

**Identify and engage key partners in HPV vaccination to develop, implement, and evaluate priority evidence-based interventions to increase HPV vaccination coverage in clinical, community and policy settings in Louisiana:**

- Encourage starting HPV vaccination at age 9 to increase series completion by age 13.
- Increase strategic partnerships to provide education on HPV cancers and administer HPV vaccinations.
- Expand Vaccines for Children program enrollment and accessibility to reach under-resourced communities.
- Increase access to HPV vaccination through expanding school-based health clinics.
- Increase social media campaigns and in-person community outreach and education of HPV vaccination as cancer prevention for everyone.
- Identify strategies to improve HPV vaccination coverage for adolescents living in rural areas.
- Explore opportunities to implement school-based strategies to improve HPV vaccination coverage.
- Engage and support state-level partners in the development and implementation of strategic plans for the elimination of HPV cancers, beginning with cervical cancer, as a public health concern.
